

# **Advancements in Emission Control and Measurement Technologies for Industrial Applications**

O'Hare International Center - Auditorium  
10275 W. Higgins Road  
Rosemont, Illinois (near O'Hare Airport)  
March 24-25, 2010

Organized by  
**Institute of Clean Air Companies**  
**Lake Michigan Air Directors Consortium**

**SAVE THE DATE**

## **Conference Highlights**

The purpose of this conference is to provide state/local and federal government agencies with the latest information on current and emerging emission control technologies for criteria and greenhouse gas (GHG) emissions.

Conference sessions will address existing, commercially available controls, upgrading existing controls, and emerging control technologies for PM, NO<sub>x</sub>, and SO<sub>2</sub>; multi-pollutant emission reduction methods; activated carbon injection; emission measurement technologies; GHG control technologies; and state perspectives on technology and measurement issues in the permitting process.

Additional information will be available soon on the LADCO web site:  
[www.ladco.org](http://www.ladco.org)
